## MILE HIGH SWINGING BRIDGE

On the highest swinging footbridge in America, you will be surrounded by the great peaks of the southern Appalachians. Crossing this famous bridge suspends visitors actually more than a mile above sea level. And every vista, in every direction you turn, brings on a sense of wonder.

## ANIMALS ON A DIFFERENT LEVEL

Your level. You'll be looking into the eyes of eagles and watching otters dive, spin and somersault underwater. And you'll see deer, panthers, black bears and cubs at play in beautiful natural settings.

## HIKING & PICNICKING

Hiking isn't required to enjoy your visit to the mountain. If so inclined, there are miles of interlaced trails—offering some of the best Alpine hiking in the South—and a couple of delightful, short walking trails. For a gentler outdoor experience, we've made it easy to find a majestic place to picnic in the midst of nature's company.

## NATURE MUSEUM

You'll learn a lot more about the mountain at Grandfather's Nature Museum. Exhibits and award-winning films speak to its many aspects—endangered species, unique weather, and colorful wildflowers and birds. Shopping is a “natural” in the Museum's shop and meals are made-to-order in its airy, family restaurant.
